Professional Summary

Motivated and detail-oriented MCA graduate seeking an entry-level position as a Python/Django Developer. Strong foundation in backend development, web technologies, and database management. Skilled in building scalable web applications using Python and Django. Passionate about learning new technologies and contributing to innovative projects.

Technical Skills

Programming Language: Python

Web Technologies: HTML, CSS, JavaScript, Angular

Framework: Django, Angular (Learning), ASP.NET Core (.NET) (Learning)

Database: SQL

Concepts: REST API, CRUD Operations, MVC Architecture, Backend Development, Frontend Integration

Development Tools: Git, VS Code, Eclipse, PyCharm

Soft Skills

- Problem-solving and analytical thinking
- Communication skills
- Team collaboration
- Time management
- Adaptability and quick learning

Career Goals

- Continuous learning in modern technologies
- Professional growth as a software developer
- Contributing effectively in collaborative environments

Strength

- Adaptability
- Teamwork
- Passion for coding
- Problem-solving ability

Projects

Student Chatbot System

Technologies: Python, Django, HTML, CSS, JavaScript, SQL

- Developed a web-based student chatbot system using Flask framework.
- Implemented user authentication, registration, and login functionality.
- Designed an interactive chat interface for handling student queries.
- Built an admin dashboard to manage users, queries, and FAQs.
- Integrated basic NLP techniques to provide automated responses.
- Performed CRUD operations for efficient data handling.

EXPERIENCE

Self Project Developer

- Built and deployed personal web applications using Django.
- Practiced debugging, optimization, and feature enhancements.
